

NPK

Compactor /Drivers

- *Oil Splash Lubrication*
- *Integrated Flow Control and Pressure Relieving Valves*
- *Optional Backfill Blades*
- *Optional Narrow Baseplate*
- *Industry's Most Comprehensive Field Service Corps*
- *Extensive Parts Distribution System*
- *Network of Nearly 300 Distributor Outlets*

NPK ATTACHMENTS...designed, built and backed by NPK.

Greater impulse energy for more compactor/driver productivity!

NPK Compactor/Drivers are designed and built to meet today's demands for greater jobsite productivity, expanding and enhancing the versatility of your backhoe or excavator.

The leader in trench compaction technology, NPK delivers the industry's greatest impulse forces with overall superior performance through hydraulically operated rotating eccentric action. Greater vibration forces generate stress waves in granular or loose soil material, bringing the soil's air to the surface and packing the particles closer together. Greater impulse action works together with the carrier's downward forces to compact cohesive clay-type soils.

Do more work safely a boom's length away

NPK's versatile Compactor/Driver can work productively virtually anywhere your excavator or backhoe boom can reach. In trenches, over and around pipe, to the top of piling and sheeting. Next to foundations and around obstructions. Even on steep slopes or rough terrain where conventional rollers and other machines either can't work or would be hazardous to try. In fact, NPK's Compactor/Drivers can keep workers a full boom's length from the compaction or driving action, away from the danger of cave-ins or equipment contact.

Select the NPK Compactor/Driver that's right for your application

NPK's full selection of Compactor/Drivers gives you the exact power you need for your jobs and jobsite conditions. The right model for carriers ranging from the smallest mini-excavators and backhoe/loaders to the larger excavators.

Headlining the list of models is NPK's C-12C, largest and most powerful boom mounted plate Compactor/Driver available anywhere.

Now available on the new C-4C model Compactor/Driver is the optional narrow baseplate. This 18" x 34" baseplate allows the operator to get into even more restricted spaces.

Optional swivel top to minimize carrier repositioning (not available on the Model C-2D), or optional dedicated top brackets available for quick-attach applications.

Heavy-duty, high-efficiency gear motor.

Self-aligning, double row spherical roller bearings.

Oil splash lubrication, eliminates routine greasing.

Rubber shock mounts to isolate vibration.

Direct drive eccentric mass.

Standard baseplate width of 23" and the narrow baseplate width of 18" now available on the C-4C model.

NPK

Cost saving versatility that is more than a promise!

NPK Compactor/Drivers actually deliver on the promise of greater cost-efficiency and jobsite versatility - operating advantages that are absolutely required by today's contractors and budget-conscious municipalities. Utilizing your carrier's hydraulic system, you save on fuel as well as the need for other costly machines and equipment, using your versatile NPK Compactor/Driver for:

- Compacting or driving anywhere a boom can go, and often where a man cannot.
- Driving pile, wood and aluminum sheeting, fence posts, guardrail posts, rail and I-beams, piling and seawalls, etc.
- Soil and aggregate compaction.
- Trench compaction, as deep as a bucket can dig.
- Steep slope compaction.
- Waste compaction at transfer stations, etc.
- Breaking up frozen coal, salt and other material.
- Extracting piling and sheeting.

Swivel feature to avoid machine repositioning

NPK's optional self-aligning swivel can align your Compactor/Driver to nearly any job from nearly any carrier position. With an excavator positioned over, parallel or perpendicular to the job, you can work productively in tight quarters, narrow trenches next to foundation walls and around manholes or other obstacles. When it's not needed, the swivel can be locked in place, either parallel or perpendicular to the boom.

**Integrated flow control
and pressure relieving valves
protect the motor from excessive flow
and pressure.**

**Hoses are routed
out of the back of
the compactor,
safely away
from the
trench wall.**

**Internally
routed hoses
for maximum
protection.**

**Optional backfill blade-
Available on all
models. This
backfill blade is
bolt-on and can be
easily removed
for trenchwork
and transport
(note: when
the backfill
blade is
removed
the backfill
blade bracket
does not extend
past the baseplate).**

Designed and built for reliability

NPK Compactor/Drivers are designed and built for optimum dependability on the most demanding jobsites. Rugged welds, heavy-duty direct drive gear motors, durable rubber shock mounts and self-aligning, double row, spherical roller bearings with a heavy-duty roller cage.

Engineered ease of installation

NPK installation kits allow for fast, easy installation with virtually any backhoe and excavator. NPK's fully engineered installation kits include steel tubes for boom and dipper stick as well as all hydraulic fittings, hoses, valves and instructions, allowing you to switch from bucket to Compactor/Driver to Hammer.
