

Sonicscout™ Material Sensor

Accurately Monitor Material on a Conveyor Belt

Quick Specs

- ▶ Belt Widths: 24" - 72"

Frequently Asked Questions

How does it work?

- ▶ As material passes, the sensor detects it on the belt. When there is no material on the belt, the sensor sends a signal (i.e. alarm, shutdown, etc.) so action can be taken.

Can you adjust the distance?

- ▶ Yes, the sensor itself has 2" of thread adjustment up or down.

What are the power requirements?

- ▶ 24VDC electric power.

Sonicscout Material Sensor

Features and Benefits

Maintain Material Flow

- ▶ Detects material on conveyor belt
- ▶ Feeds data to machine's automation program

Heavy Duty Sensor

- ▶ Unaffected by winds up to 30 MPH
- ▶ Unaffected by external noise
- ▶ Tolerates dusty environments
- ▶ Tolerates temperatures down to -14° F

Easy Installation

- ▶ Adjust to custom belt widths (Fig 22.1)
- ▶ Attaches to all brands of idler frames

Replacement Parts

Part Number	Description
11-00966	Switch
11-01122	Cord
32-000071	Mount 24-48
32-000072	Mount 54-72

Flow Switch

Part Number	Belt Width
18-10002	24-48
18-10003	54-72
