WA900-3 WHEEL LOADER

WALK-AROUND

High Productivity & Low Fuel Consumption

- High performance SAA12V140E-3 engine
- Low fuel consumption
- Dual-mode active working power select system
- Large dumping clearance

Excellent Operator Environment

- Automatic transmission with Electronically Controlled Modulation Valve (ECMV)
- Advanced Joystick Steering System (AJSS)
- Roomy, quiet cab with power windows
- Low vibration & noise
- Pillar less large cab with ROPS/FOPS Level 2 canopy
- Comfortable operator's seat

Harmony with the Environment

- EPA Tier 2 emissions certified
- Low fuel consumption

NET HORSEPOWER

638 kW 856 HP @ 2050 rpm

OPERATING WEIGHT107200 - 107350 kg
236,340 - 236,670 lb**BUCKET CAPACITY**11.5 - 13.0 m³ 15.0 - 17.0 yd³**Reliability**

- Reliable Komatsu designed and manufactured components
- Sturdy main frame
- Adjustment-free, fully hydraulic, wet disc brakes
- Hydraulic hoses use flat face O-ring seals
- Cation electrodeposition process is used to apply primer paint
- Powder coating process is used to apply main structure paint
- Sealed DT connectors for electrical connections

Easy Maintenance

- Simple checks
- KOMTRAX Plus
- Rear access stairs
- Auto greasing system

WA900-3 WHEEL LOADER

PRODUCTIVITY AND FUEL ECONOMY FEATURES

High Performance SAA12V140E-3 Engine

Electronic Heavy Duty Common Rail fuel injection system provides optimum combustion of fuel.

This system also provides fast throttle response to match the machine's powerful tractive effort and fast hydraulic response.

Net: 638 kW 856 HP

Low Emission Engine

This engine is EPA Tier 2 emission certified without sacrificing power or machine productivity.

Low Fuel Consumption

Low fuel consumption is achieved because of the low-noise, high-torque engine and the large-capacity torque converter with maximum efficiency in the low-speed range.

Durable Buckets

Komatsu buckets are manufactured using high-tensile strength steel with replaceable welded wear plates for extended bucket life. Additional strength has been added to the bucket bottom corners, side edges, and spill guard ends for increased durability.

Bucket capacities

13.0 m³ 17.0 yd³ Standard boom

11.5 m³ 15.0 yd³ High-lift boom

Dual-Mode Active Working System

The machine is equipped with a two mode active working system. This system provides the most efficient hydraulic flow for your operation. The

active working switch has two modes: Powerful Loading or Normal Loading.

Dual modes switch

• Powerful Loading Mode:

Hydraulic flow to the work equipment is increased and reduced as required.

• Normal Loading Mode:

All hydraulic flow from the loader pump is transferred directly to the work equipment.

Large Dumping Clearance

The WA900-3 was designed with ample dumping clearance for dump truck matching.

High Breakout Force

Komatsu wheel loaders have high-tensile steel Z-bar loader linkages for maximum rigidity and maximum breakout force. Sealed loader linkage pins extend greasing intervals.

67900 kg 149,690 lb Breakout force

13.0 m³ 17.0 yd³ spade nose bucket with teeth

Excellent Stability

The WA900-3 has the widest tread in its class 3,350 mm 11'0" and a long 5,450 mm 17'11" wheelbase, for maximum machine stability.

Static tipping load

(with 45/65-45, 58 PR (L-5) tires / bucket 13.0 m³ 17.0 yd³)

65670 kg 144,780 lb Straight

57430 kg 126,610 lb 40° full turn

RELIABILITY FEATURES

Components

Komatsu manufactures the engine, torque converter, transmission, hydraulic units, and electric parts. Komatsu loaders are manufactured with an integrated production system under strict quality control.

Engine Pre-lube System

Durability of the engine is achieved by raising the engine oil pressure before starting the engine. When the operator turns the key, the pre-lubrication pump sends oil from the engine oil pan to the engine oil filter and raises the pressure of that oil to the set pressure. Then, the starting motor rotates to start the engine.

Adjustment-free Braking System

Wet multi-disc service brakes and fully hydraulic braking system mean lower maintenance costs and higher reliability. Wet disc brakes are fully sealed, helping keep contaminants out, reducing wear and maintenance. Brakes are adjustment-free, meaning even lower maintenance. Reliability is designed into the braking system by the use of two independent hydraulic circuits. This provides hydraulic backup should one of the circuits fail. Fully hydraulic brakes mean no air system to bleed, or condensation water in the system that can lead to contamination, corrosion or freezing.

High-rigidity Frames and Loader Linkage

The front and rear frames and the loader linkage have more torsional rigidity to secure resistance against increased stress. Frame and loader linkage are designed to accommodate actual working loads and simulated computer testing proves it's strength.

Flat Face-to-face O-ring Seals

Flat face-to-face O-ring seals are used to securely seal hydraulic hose connections and prevent oil leakage.

In addition, buffer rings are installed to the head side of the hydraulic cylinders to lower the load on the rod seals and maximize reliability.

Cation Electrodeposition Primer Paint/ Powder Coating Final Paint

Cation electrodeposition paint is applied as a primer paint and powder coating is applied as topcoat to the exterior sheet metal parts. This process results in a durable paint finish, even in the most severe environments. Some external parts are made of plastic, providing long life and high impact resistance.

Sealed DT Connectors

Main harnesses and controller connectors are equipped with sealed DT connectors providing high reliability, water resistance and dust resistance.

MAINTENANCE FEATURES

Photo may include optional equipment.

Simple Checks, Easy Maintenance

The main monitor and the maintenance monitor (EDIMOS II) are neatly arranged for a quick, clear reading of machine functions. The main monitor also has a diagnostic function.

Main monitor

Maintenance monitor

Large Side Door

Right side door is easy to open and provides accessibility for maintenance.

Rear Access Stairs

For the purpose of boarding and exiting the machine, rear access stairs with handrail are provided. The step width clearance and the step angle have been designed for easy entry and exit. A step light is provided for night boarding.

KOMTRAX Plus

As part of a complete service and support program, Komatsu equips every mining and quarry sized machine with KOMTRAX Plus. By using a satellite-based communication system, KOMTRAX Plus offers a new vision of monitoring your valuable assets by providing insight to critical operating metrics and information that can be used to increase availability, lower owning and operating costs and maximize fuel efficiency.

The KOMTRAX Plus information available on MyKomatsu.com allows service personnel and asset owners to review cautions, operational data, fuel consumption,

payloads and key component measurements provided in forms of trends. With KOMTRAX Plus, knowledge becomes the power to fuel your productivity.

Fuel Tank Cap with Mud Cover and Large Tool Box

Fuel tank cap

Tool box

Auto-Greasing System

The periodic lubrication points, except for the drive shaft, are greased automatically according to a preset amount and interval. Quick-change grease canisters make replacement easy and clean.

OPERATOR ENVIRONMENT

Easy Operation

Automatic Transmission with Electronically Controlled Modulation Valve (ECMV)

Automatic transmission with ECMV automatically selects the proper gear speed based on travel speed, engine speed, and other travel conditions. The ECMV system engages the clutch smoothly to prevent lags and shocks when shifting. This system provides efficient machine operation and a comfortable ride.

● **Kick-down switch:**

This valuable feature increases productivity. With the touch of a finger, the kick-down switch automatically downshifts from second to first when beginning the digging cycle. It automatically upshifts from first to second when the direction control lever is placed in reverse. This increases rim pull for better bucket penetration and reduced cycle times for higher productivity.

● **Hold switch:** If auto shift is selected and the operator activates this switch when the lever is at the 3rd gear speed position, the transmission is fixed to the current gear speed.

Remote Boom Positioner

The highest and lowest position of the bucket can be set from the cab to match any truck body. Once the positioner is set, the bucket is smoothly stopped at desired position with no shock.

1: Remote boom positioner switch

Variable Transmission Cut-off System

The operator can set the transmission cut-off pressure desired for the left brake pedal using the switch located on the right-side control panel. The operator can improve the working performance by setting the cut-off pressure to match working conditions.

- High cut-off pressure for digging operations.
- Low cut-off pressure for truck-loading operations.

2: T/M cut-off ON/OFF switch

3: T/M cut-off set switch

Advanced Joystick Steering System (AJSS)

AJSS is a feedback steering system which has been incorporated to allow steering and forward and reverse selection to be controlled by wrist and finger control.

With the feedback function, the machine steering angle is exactly the same angle as the lever tilt angle.

Comfortable Operation

Roomy, Quiet Cab With Power Windows

The cab is large, with a comfortably spacious interior and power windows. By adopting a high-capacity air conditioner, Komatsu ensures operator comfort, no matter the exterior conditions. Other features designed with operators in mind include a lunchbox storage space.

Lunchbox storage space

Low Vibration & Noise

The cab rests on Komatsu viscous damping mounts (rubber and silicon oil) to reduce vibration and noise. All hydraulic equipment is mounted on high-resistance rubber to further reduce vibration and noise. Noise level at the operator's ear is 75 dB(A).

Comfortable Operator's Seat

The operator's seat has a reclining/air suspension design with headrest to support the operator comfortably during long operation. Also, it is easy to adjust seat height with air suspension.

Pillar less Large Cab with ROPS / FOPS Level 2 Canopy

Wide pillar less flat glass provides excellent front visibility. The wiper arm covers a large area to provide great visibility even on rainy days.

Rear heated glass provides clear view even in freezing or humid conditions.

WA900-3 WHEEL LOADER

SPECIFICATIONS

ENGINE

Model Komatsu SAA12V140E-3
 Type Water-cooled, 4-cycle
 Aspiration Turbocharged, air-to-air aftercooled
 Number of cylinders 12
 Bore x stroke 140 mm x 165 mm **5.51" x 6.50"**
 Piston displacement 30.48 ltr **1860 in³**
 Governor all-speed, electronic
 Flywheel horsepower
 SAE J1995 Gross 672 kW **900 HP**
 ISO 9249/SAE J1349 Net 638 kW **856 HP**
 Rated rpm 2050 rpm
 Fan drive method for radiator cooling Mechanical
 Fuel system Direct injection
 Lubrication system:
 Method Gear pump, force-lubrication
 Filter Full-flow and bypass combined
 Air cleaner Dry type with automatic dust ejector
 and pre-cleaner, cyclopac with vacuator

EPA Tier 2 emissions certified.

TRANSMISSION

Torque converter:
 Type 3-element, single-stage, single-phase
 Transmission:
 Type Full-powershift, planetary type
 Travel speed: km/h **mph**
 Measured with 45/65-45, 58 PR (L-5)

	1st	2nd	3rd
Forward	7.0 4.3	12.3 7.6	28.0 17.4
Reverse	7.1 4.4	12.4 7.7	28.3 17.6

AXLES AND FINAL DRIVES

Drive system Four-wheel drive
 Front Fixed, full-floating
 Rear Center-pin support, full-floating,
 22° total oscillation
 Reduction gear Spiral bevel gear
 Differential gear Straight bevel gear
 Final reduction gear Planetary gear, single reduction, oil bath

BRAKES

Service brakes Hydraulically actuated,
 wet disc brakes actuate on four wheels
 Parking brake Dry disc brake
 Secondary brake Parking brake is commonly used

STEERING SYSTEM

Type Articulated type, full-hydraulic power steering
 Steering angle 40° each direction
 Minimum turning radius at
 the center of outside tire 9200 mm **30'2"**

HYDRAULIC SYSTEM

Steering system:
 Hydraulic pump Piston pump
 Capacity 315 ltr/min **83.2 U.S. gal/min** at rated rpm
 Relief valve setting 31.4 MPa 320 kgf/cm² **4,550 psi**
 Hydraulic cylinders:
 Type Double-acting, piston type
 Number of cylinders 2
 Bore x stroke 160 mm x 503 mm **6.3" x 19.8"**
 Loader control:
 Hydraulic pump Piston pump
 Capacity 415 ltr/min **109.6 U.S. gal/min** at rated rpm
 Relief valve setting 34.3 MPa 350 kgf/cm² **4,977 psi**
 Hydraulic cylinders:
 Type Double-acting, piston type
 Number of cylinders—bore x stroke:
 Boom cylinder 2- 260 mm x 1368 mm **10.2" x 53.9"**
 Bucket cylinder 1- 300 mm x 906 mm **11.8" x 35.7"**
 Control valve Two spool
 Control positions:
 Boom Raise, hold, lower, and float
 Bucket Tilt-back, hold, and dump
 Hydraulic cycle time (rated load in bucket)
 Raise 11.2 sec
 Dump 2.0 sec
 Lower (Empty) 4.8 sec

ROPS / FOPS LEVEL 2 AND CAB

The cab is mounted on viscous damping mounts and is well insulated.

SERVICE REFILL CAPACITIES

Cooling system 337 ltr **89.0 U.S. gal**
 Fuel tank 1555 ltr **410.8 U.S. gal**
 Engine 130 ltr **34.3 U.S. gal**
 Hydraulic system 725 ltr **191.5 U.S. gal**
 Axle (each front and rear) 360 ltr **95.1 U.S. gal**
 Torque converter and transmission 140 ltr **37.0 U.S. gal**

BUCKET SELECTION GUIDE

DIMENSIONS

Measured with 45/65-45, 58PR(L-5) tires

	Standard Boom	High lift Boom
Tread	3350 mm 11'0"	
Width over tires	4585 mm 15'1"

40° full turn	57430 kg 126,610 lb	55030 kg 121,320 lb
Breakout force	666 kN 67900 kgf 149,690 lb	703 kN 71700 kgf 158,070 lb
Operating weight	107200 kg 236,340 lb	107350 kg 236,670 lb

* At the end of tooth

All dimensions, weights, and performance values based on SAE J732c and J742b standards.

Static tipping load and operating weight shown include lubricant, coolant, full fuel tank, ROPS canopy, cab, air conditioner, bucket and operator. Machine stability and operating weight are affected by counterweight, or ballast, tire size, and other attachments. Use either counterweight or ballast, not both.

STANDARD EQUIPMENT

- AM/FM stereo radio cassette
- Advanced Joystick Steering System (AJSS)
- Alternator, 90 A/24 V
- Air conditioner
- Ashtray and cigarette lighter
- Automatic greasing
- Automatic transmission F3 / R3
- Back-up alarm
- Back-up light
- Batteries, 160 Ah/12 V x 4
- Boom kick-out
- Bucket positioner
- Cab including front and rear wipers, windshield washers, and power windows
- Counterweight
- Directional signal
- Parking brake
- Engine, Komatsu SAA12V140E-3 diesel
- Engine pre-lube system
- Fast fill fuel system
- Fire extinguisher
- Floormat
- Front working lights two (2)
- Hard water area arrangement (corrosion resister)
- Head lights two (2)
- Heater and defroster
- KOMTRAX Plus
- Power train guard
- Radiator grid, lattice type
- Rear access stairs
- Rear defroster (electric)
- Rims for 45/65-45 tires
- Rearview mirrors
- Rear working lights two (2)
- Room mirror
- ROPS/FOPS Level 2 canopy
- Seat belt, 76 mm 3" wide retractable
- Seat, air suspension type with reclining
- Secondary steering
- Service brakes, wet disc type
- Side working lights two (2)
- Starting motor, 7.5 kW/24 V x 2
- Sun visor
- Two (2)-spool valve for boom and bucket controls
- Vandalism protection
- Water separator

OPTIONAL EQUIPMENT

- Counterweight for high lift boom
- High lift boom
- Lift cylinders and bucket cylinder
- Standard boom

KOMATSU®
